REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The present application has been refiled for consideration of newly cited prior art. This art is held to neither disclose nor teach the present specific N-triazinyl-N'-[substituted thienyl(amino)sulfonyl] ureas. Specifically, the compounds of Mayer et al. differ in containing a phenyl group (and without the present ring substitution) rather than a thienyl group; the compounds of Kim et al. differ at least in not having the present required carboxy substitution on the thienyl ring; and the compounds of the Canadian patent differ at least in the ring position of the carboxy substitution (the present substitution being adjacent to the S ring atom). No motivation is seen to modify these art compounds to obtain the present specifically substituted compounds.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
